## *Education*

---

### **The University of Louisiana at Lafayette**

Associate's Degree in Informatics

2016 - 2018

### **Saint Thomas More High School**

Diploma

2012 - 2016

## *Experience*

---

### **Founder - Stake.gg**

Present

- Designed and developed full-stack software applications for on-chain data analysis using natural language.
- Built custom data aggregation pipelines for on-chain and off-chain data.
- Built a context-driven, A.I. chat assistant accessible through discord and web interfaces.
- Developed an A.I. native financial terminal for tracking and analyzing digital assets and protocols.

### **Software Developer - US Surety**

2018 - 2023

- Built software applications for importing, creating, reading and exporting bond information.
- Built data visualization components with React and JavaScript charting libraries.
- Worked on-call to resolve staff technical issues.

### **Web Developer - Freelance**

2016 - 2019

- Designed and developed web applications for clients.
- Utilized design tools such as Figma and AdobeXD to create wireframes and interactive prototypes.
- Guided clients through the process of hosting, deploying, and maintaining static websites.
